Upload images from your computer like you would send an email attachment. Alternatively, click UPLOADING TOOLS to download and use programs that make it easier to upload multiple pictures at the same time.

Add TAGS for your images. TAGS do NOT have any spaces, and identify what your image is about. TAGS permit the creation of "folksonomies" which organize content dynamically.

8

Set privacy settings before you click UPLOAD. Make sure you have permission to share images. If you're sharing images of your own children or grandchildren, it is a good idea to NOT make those images public.

9

Before uploading you can also set a safety level and content type, and choose to hide the images from public searches.

▾ Hide advanced settings (More info)

Set safety level
- ● Safe (your default)
- ○ Moderate
- ○ Restricted

Set content type
- ● Photos (your default)
- ○ Screenshots
- ○ Art, illustration, CGI or other non-photographic images

Hide these images from public searches?
- ☐ Yes

[UPLOAD]

* Safe - Content suitable for a global, public audience
* Moderate - If you're not sure whether your content is suitable for a global, public audience but you think that it doesn't need to be restricted per se, this category is for you
* Restricted - This is content you probably wouldn't show to your mum, and definitely shouldn't be seen by kids
